

AtmosAir Rainier Summit

APPLICATION

The AtmosAir Rainier Summit is a standalone self contained compact unit designed to increase ionization levels to restore indoor air to its natural state where no pollution or contaminants exist.

The Rainier's patented active ionization technology has been rigorously tested and scientifically proven to be extremely effective at reducing harmful particulates, irritating volatile organic compounds (VOC's) and odors as well as killing off mold, bacteria, viruses and germs in the air and on surfaces.

The RI model is typically used for spaces up to 800 square feet in size.

As odor concentrations are greater the effective range of the unit will be slightly decreased.

The RI model uses 1 MCC B ionization tube and is equipped with a MERV 13 filter. A carbon impregnated filter is also available in applications where pronounced odors exist

The tube will need to be replaced every 2 years to ensure peak performance. The filter at the air intake of the unit will need to be periodically replaced as required.

SPECIFICATIONS

Air Flow Capacity.....Variable; up to 100 CFM
Treatment Area.....1,000 SQ.FT or 8,000 CU.FT
Housing Material.....Powder Coated Steel
Weight.....7.75 pounds
Maximum Operation Temperature.....150° F (65.5° C)

ELECTRICAL

Voltage.....120 VAC
Frequency.....60 Hz
Power Consumption.....45 watts
Current Draw.....0.6 Amps
Internal Fuse.....1.25 Amp
Field Electrical Connection.....NEMA 15 Receptacle

IONIZATION TUBE

Material.....Mono-Core Composite
Number.....One (1)
Size.....B
Tube Life.....17,600 Hours

Features

- On/off switch on rear
- Soft-glow blue LED power light on front
- MERV13 Filter or Carbon Impregnated Filter
- Noise level on max fan setting at 1 meter = 45 dB-A
